

Omotosho Gbolahan Hammed
Cybersecurity Engineer | Software Developer | AI/ML Engineer
+234 8022648626 | hammedg621@gmail.com
<https://github.com/Gbolahanomotosho>

ELIGIBLE FOR:

- Germany (IT Specialist Visa)
 - Netherlands (Highly Skilled Migrant)
 - UK (Skilled Worker Visa)
 - Austria (Red-White-Red Card)
 - Belgium (EU Blue Card)
- 7+ years IT experience, no degree required

MASTER PORTFOLIO – CYBERSECURITY + SOFTWARE + AI/ML

| Quick Facts |

|-----|

| Cybersecurity Experience: 7+ years |

| Software Development: 6+ years |

| AI/ML Experience: 2+ years |

| EU TECH VISAS: Germany (IT Specialist Visa), Netherlands (Highly Skilled Migrant), UK, Austria, Belgium – 7+ years IT experience, no degree required |

| Relocation: Ready immediately upon visa approval |

SECTION 1: CYBERSECURITY SKILLS

| Skill Area | Specific Competencies |

|-----|-----|

| Network Security | Firewall configuration, VPNs, IDS/IPS, network monitoring |

| Ethical Hacking | Penetration testing, vulnerability assessment, threat modeling |

| Cryptography | Encryption protocols, key management, secure communications |

| Digital Forensics | Incident response, log analysis, evidence collection |

| Security Audits | Compliance checks (ISO 27001, GDPR basics), risk assessment |

Key Cybersecurity Achievement:

- Conducted security audits for multiple clients, identifying and patching an average of 12 critical vulnerabilities per quarter
- Implemented monitoring systems that reduced security incidents by 40% within 6 months

SECTION 2: SOFTWARE DEVELOPMENT SKILLS

| Skill Area | Specific Competencies |

|-----|-----|

| Languages | Python, JavaScript, SQL |

| Backend | FastAPI, Flask, REST API design |

| Frontend | HTML, CSS, basic JavaScript |

| Databases | PostgreSQL, SQLite |

| DevOps | Docker, Git, Linux, cloud deployment (Render) |

Key Software Development Achievements:

- Built full-stack web applications (ClariScan, MediScan, Gem)

- Created multiple Telegram bots (Stock-Sight, PlutoPay)
- Deployed applications on Render cloud platform

SECTION 3: AI & MACHINE LEARNING SKILLS

Skill Area	Specific Competencies
Computer Vision	YOLOv8, PyTorch, image classification, object detection
LLM Integration	OpenAI API, prompt engineering, multi-provider abstraction
Voice Processing	OpenAI Whisper (speech-to-text, multi-language)
OCR	Tesseract – text extraction from images
Model Deployment	Exporting models to production (Flask/FastAPI)

Key AI Achievements:

- Trained custom YOLOv8 model for fracture detection (ClariScan)
- Built multi-AI provider abstraction layer (Gem)
- Integrated voice + image AI into production fintech assistant (PlutoPay)

SECTION 4: PROJECT SHOWCASE

Project	Domain	Key Technologies	What I Built
PlutoPay	(Private – demo on request)	AI Fintech Python, FastAPI, Whisper, OCR, PostgreSQL	Voice/image/text banking assistant with internal stablecoin
ClariScan	AI Medical	YOLOv8, Flask, SQLite, ReportLab	Fracture detection from X-rays with PDF reports
MediScan	AI Medical	PyTorch, Flask, SQLite, Render	Multi-disease analysis for X-ray/CT/MRI
Stock-Sight	Software Dev	Python, Telegram API, Yahoo Finance	Real-time stock alert Telegram bot
Gem	AI EdTech	Flask, Multi-AI API, SQLite	Educational assistant with multiple AI backends
Cybersecurity Work	Security	Various tools	7+ years of security audits, threat detection, incident response

SECTION 5: EU TECH VISA – EMPLOYER FAQ

Question	Answer
What is the EU Tech Visa?	Allows IT professionals without a degree to work in EU if they have 3+ years experience
Do I qualify?	YES – 7+ years combined in cybersecurity, software, and AI/ML
What do I need from an employer?	A signed employment contract (minimum €41,000–€45,300 depending on role)
Who handles the visa process?	I apply at the EU Country Embassy in Lagos/Abuja after receiving the contract
How long does it take?	4–12 weeks from application to arrival

SECTION 6: WHY HIRE ME?

Reason	Details
--------	---------

-----	-----		****Three skills in one****	Cybersecurity + Software Dev + AI/ML – rare combination
****Visa ready****	No degree recognition hassle. EU Tech Visa is straightforward			
****Project proof****	Every AI/software project has working code on GitHub			
****Self-starter****	Built complex projects alone from concept to deployment			
****Cost-effective****	Competitive salary expectations (€45k–55k to start)			
****Ready to relocate****	Immediately upon visa approval			

SECTION 7: EDUCATION & AWARD

Qualification	Institution	Year
HND, Marine Engineering	Maritime Academy of Nigeria	2023 – 2025
OND, Marine Engineering	FCFMT	2019 – 2022
Cybersecurity Specialist Course	Coursenetics	2018–2020
Pentesting Award	Coursenetics	2019
Leadership Award	BlueDevTech	2021

Note: My HND is not required for the EU Tech Visa. My 7+ years of IT experience is the qualification that matters for EU Country immigration.

SECTION 8: CONTACT & VISA STATUS

Omotosho Gbolahan Hammed
